

Strategic Export Controls

Quarterly Report

April – June 2005

This quarterly report covers export licensing decisions made by Her Majesty's Government between 1st April 2005 and 30th June 2005. Unlike previous quarterly reports, all the information relating to a destination is shown together. This means that the reader will find all (if any) information on SIELs, OIELs, SITLs, SITCLs and OITCLs all on one place, rather than split over 2 sections. This should enhance the readability of the information.

The information within the report covers those licences Issued, Refused or Revoked within the period for the following categories:

- Standard Individual Export Licences (SIELs) (including information on incorporation and Standard Individual Transshipment Licences)
- Open individual Export Licences (OIELs)
- Open Individual Trade Control Licences (OITCLs)
- Standard Individual Trade Control Licences (SITCLs)

General Information

SIELs

SIELs generally allow shipments of specified items to a specified consignee up to the quantity specified by the licence. Licences permitting permanent export are generally valid for 2 years from date of issue. Where the export is temporary, for example for the purposes of demonstration, trial or evaluation, the licence is generally valid for one year only and the items must be returned before the licence expires. A licence is not required for the majority of transshipments through the UK en-route from one country to another, providing certain conditions are met. Most other transshipments can be made under one of the Open General Transshipment Licences, provided in all cases that the relevant conditions are met. Where this is not the case, a Standard Individual Transshipment Licence (SITL) is required.

The information on SIELs included in this Report has been compiled using the Export Control Organisation's computer databases. The databases were interrogated during the compilation of this Report to identify the status of all applications on which a decision was taken during the period covered by this Report. In a small number of cases there may be a subsequent change of status. There are two main reasons for such changes: a licence issued during the period may have been revoked, for example because of the imposition of trade sanctions or an arms embargo; or a decision during

the period to refuse a licence might be overturned because the applicant later appealed successfully.

During the period, 1,602 SIELs were issued, 43 were refused, and none were revoked.

OIELs

OIELs are specific to an individual exporter and cover multiple shipments of specified items to specified destinations and/or, in some cases, specified consignees. OIELs covering the export of both Military List and Dual Use items are generally valid for up to 5 years. There are no Open Individual Licences for transshipments. During this reporting period 150 OIELs were issued, no OIELs were amended during the period to exclude particular destinations and/or items, 3 applications for OIELs were refused in full and no OIELs were revoked. It should be noted that refusal of an application for an OIEL, amendment to exclude particular destinations and/or items, or the revocation of an OIEL, does not prevent a company from applying for a SIEL covering some or all of the items concerned to specified consignees for the relevant destinations. Clearly, however, the factors that led to the original decision would be taken into account on the decision on any such application.

A summary description is provided for all items covered by SIELs and OIELs issued for this period. The Report also gives information on the number of small arms covered by SIELs issued during the period. However, this information is not provided in cases where the information is exempt from disclosure consistent with the terms of the Freedom of Information Act 2000. No such exclusions were made in this Report.

In the case of SIELs refused or revoked, only the rating of the goods is provided. Likewise for OIELs, only details of ratings are provided for licences revoked, refused in full, or where coverage was amended during the period by the exclusion of the destination (including items excluded during this quarter by the amendment of licences issued in the first quarter of 2005, and of pre-2005 licences).

TRADE LICENCES

Standard Individual Trade Control Licences (SITCLs);

A Standard Individual Trade Control Licence (SITCL) is specific to a named trader and covers involvement in the trading of a set quantity of specific goods between a specific source and destination country with a specified consignor, consignee and end-user. SITCLs will normally be valid for two years. Upon expiry either by time or

because the activity has taken place, the licence ceases to be valid and must be returned to the Export Control Organisation. Should further similar activity take place, a further licence must be applied for. During the period 27 SITCLs were issued, 1 was refused, and none were revoked.

Open Individual Trade Control Licences (OITCLs)

An Open Individual Trade Control Licence (OITCL) is specific to a named trader and covers involvement in the trading of specific goods between specific source and destination countries and/or specified consignors, consignees and end-users. OITCLs are generally valid for 2 years. During the period 2 OITCLs were issued, 1 was refused, and none were revoked.

A lower level of information is provided on both OITCLs and SITCLs as the release of further information at this stage may have an adverse commercial effect on some of the activities being undertaken. Information on the goods summaries covered by OITCLs and SITCLs issued will be published in the 2005 Strategic Export Controls Annual Report.

INFORMATION ON SIELS, SITLS AND OIELS

The entry for each destination contains the following:

For SIELs:

- The total value of all applications in respect of which a SIEL was issued for the export of items to the destination concerned during the period, whether the export concerned was permanent or temporary. The total value of SIELs, by destination, is arranged into 3 bands: £100,000 or lower, up to £250,000 and; for larger amounts, rounded to the nearest £500,000. The lower level of less than £100,000 was introduced as a result of moving to quarterly reporting, and reflects the fact that for some destinations the value of SIELs issued can be quite low.

It should be noted that the actual value of exports made under the licences is likely to be less than shown because some of these licences will not be used to make all of the exports authorised and others will not be used at all. In addition, some items are exported only temporarily and are later returned to the UK.

- The number of licences issued, including numbers of licences for items on the Military List, for other items and for both.

- A summary description of the items covered by the licences issued during the period, with the items that were allowed for temporary export indicated by a "T" preceding the description. The data on refused SIEL applications does not include those refused during this period following an appeal against an earlier refusal. It does include applications refused during this period that, at the end of this period, were pending a decision on an appeal. The SIELs data also does not cover goods that were removed from an application before a licence was issued, applications withdrawn or stopped before a decision was reached, or applications where it was determined that no licence was required or that the goods could be exported to the destination concerned under an Open General Export Licence (OGEL).

In a small number of cases SIELs may be issued identifying more than one destination. This normally arises where a licence is issued for the temporary export of items for exhibition or demonstration in more than one destination. Details of these licences are included in the information for each relevant destination. This means that the total number of SIELs issued, as shown above, is slightly lower than the sum of all SIELs issued shown on the destination pages.

For Incorporation:

- Information on incorporation, provided in the same format as for SIELs, and including the same level of information.

For SITLs:

- Information on SITLs, provided in the same format as for SIELs. However, the items covered by SITL merely pass through the UK and it would therefore be misleading to include a 'value' for these licences in the report.

For OIELs:

- The number of licences issued, including additional items authorised during this quarter through amendment to a licence issued in the first quarter of 2005, or a pre-2005 licence.

- A summary description of the items covered by each OIEL, listed under each destination covered by the OIEL, with the items that were allowed for temporary export indicated by a "T" preceding the description.

- Information is also provided on the relevant destination pages for OIEL applications refused in full, or revoked or where coverage was amended

during the period by the exclusion of the destination or by the exclusion of items in this quarter by amendment to licences issued in the first quarter of 2005 or earlier.

The destination coverage of an OIEL may be amended for a variety of reasons, but mainly in light of recommendations received from advisory departments. Sometimes amendments follow the imposition of an arms embargo, but they may also reflect general concerns about the destination or a relevant change in circumstances there. A decision to exclude a particular country from the coverage of an OIEL does not mean that country is permanently excluded. Where the concerns that led to the original decision are no longer relevant, it might be decided to reinstate that destination.

The OIELs data does not cover applications from which specific items or destinations were removed before an OIEL was issued, or applications withdrawn before a decision was reached, or those for which it was determined that no licence was required, or that the items could be exported to the destination concerned under an OGEL.

The information does not cover OIELs whose period of validity was extended temporarily during the period pending a decision on an application for a new OIEL. Such cases amount to a temporary extension of an OIEL granted in an earlier period. The decision on the new application will be covered in this or a future report, as the case may be. As OIELs cover multiple shipments of specified goods to specified destinations or specified consignees, exporters holding OIELs are not asked to provide details of the value of goods they propose to ship under an OIEL and it is therefore not possible to provide information on the total value of OIELs issued.

Special OIELs

There are four special categories of OIELs:

Media OIELs

Media OIELs authorise the export of protective clothing and equipment, mainly for the protection of aid agency workers and journalists, in areas of conflict. Following representations from the

community, a revised OIEL was made available (from mid-November 2004) that enables such organisations to deploy a broader range of controlled equipment. In addition to military helmets and body armour, the revised licence includes NBC protective items, non-military 4WD civilian vehicles with ballistic protection and specially designed components for any of these goods. The licence permits these goods to be exported to all destinations on a temporary basis only, i.e. the goods must be returned to the United Kingdom when no longer required. During this reporting period, no Media OIELs were issued.

Continental Shelf OIELs

Continental Shelf OIELs authorise the export of controlled goods to the UK sector of the Continental Shelf for the use only on, or in connection with, offshore installation and associated vessels. During this reporting period, no Continental Shelf OIELs was issued.

Global Project Licences

This is a form of export licence that has been introduced by Framework Agreement (FA) partners (UK, France, Italy, Sweden, Spain and Germany) to streamline the arrangements for licensing military goods and technologies between them, where these transfers relate to their participation on specific collaborative defence projects. In relation to the collaborative project, each Partner state will, as appropriate, issue their own GPLs to permit transfers of specified goods and technology where these are required for that programme. The GPLs operate on a similar basis to UK Open Individual Export Licences. In the UK, applications for GPLs are assessed against the Consolidated Criteria. During this reporting period, no GPLs were issued.

Transfer of Technology and Technical Assistance

These SIELs and OIELs are issued for the transfer of technology and provision of technical assistance under Articles 8, 9 and 10 of the Export Of Goods, Transfer of Technology and Provision of Technical Assistance (Control) Order 2003. During this reporting period, 1 OIEL was issued, and there were no OIEL refusals or revocations. No SIELs were issued, refused or revoked.

Section 1

In this section, the entries are listed by *DESTINATION*.

Dealer to Dealer (Dealer) Open Individual Export Licences (OIELs)

Dealer OIELs authorise UK registered firearms dealers to export certain categories of firearms and ammunition solely to other registered firearms dealers on the European Union only, provided that copies of valid documentation are forwarded to the Export Control Organisation at least 2 working days before each shipment.

The following is a list of the items that have been authorised for export to the following destinations only:

Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden

No of licences Issued	Goods Summary
5	semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquilising rifles, shotguns, vintage shotguns, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquilising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition

Afghanistan

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £100,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	3
Other items	0
Military List and other items	0
Total number of SIELs issued	3

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

body armour*
 components for body armour
 general naval vessel components
 military helmets*
 smoke ammunition

* the goods on these licences are for use by NATO staff

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.

Other items	0
Military List and other items	0
Total number of SIELs issued	7

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- ammunition for wall and door breaching projectile launchers
- components for general purpose machine guns
- components for submachine guns
- T firearm training simulators
- general purpose machine guns (2)
- gun silencers
- military devices for initiating explosives
- military small arms training equipment
- projectile launchers
- T software for the use of firearm training simulators
- sporting gun ammunition
- submachine guns (2)
- tear gas/irritant ammunition
- T technology for the use of firearm training simulators
- technology for the use of general purpose machine guns
- technology for the use of submachine guns
- weapon cleaning equipment
- weapon sight mounts
- weapon sights (2 licences)
- T weapon sights

OPEN INDIVIDUAL EXPORT LICENCES

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 1.0m
---	--------

Number of SIELs issued covering:	
Items on the Military List	6
Other items	1
Military List and other items	0
Total number of SIELs issued	7

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- anthrax vaccines

armoured plate
body armour
components for body armour
components for combat helicopters
components for military improvised explosive device jamming equipment
military improvised explosive device jamming equipment
shotguns (2)
software for the use of military improvised explosive device jamming equipment
technology for the use of military improvised explosive device jamming equipment
technology for the use of NBC filters

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	components for combat helicopters, components for military utility helicopters
2	P	components for military transport aircraft, technology for the use of components for military transport aircraft
3	P	technology for the production of components for biological agent detection equipment, technology for the production of components for chemical agent detection equipment
4	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, chemical agent detection equipment training equipment, components for chemical agent detection equipment training equipment, military electronic equipment, components for military electronic equipment, biological agent detection equipment, components for biological agent detection equipment, improvised explosive device detection equipment, components for improvised explosive device detection equipment, software for the use of biological agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of improvised explosive device detection equipment, technology for the use of biological agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of improvised explosive device detection equipment, test equipment for biological agent detection equipment, test equipment for chemical agent detection equipment, test equipment for military electronic equipment, test equipment for improvised explosive device detection equipment, equipment for the use of biological agent detection equipment, equipment for the use of chemical agent detection equipment, equipment for the use of military electronic equipment, equipment for the use of improvised explosive device detection equipment
5	P	components for air to air missile launching equipment, components for air to surface missile launching equipment, components for combat aircraft
6	P	demolition charges, equipment for the use of demolition charges, explosives
7	P	software for the use of test equipment for missile jamming equipment, software for the use of test equipment for optical target designator equipment, software for the use of test equipment for optical target tracking equipment, software for the use of test equipment for optical target acquisition equipment, software for the use of test equipment for laser range finder, technology for the use of test equipment for missile jamming equipment, technology for the use of test equipment for optical target designator equipment, technology for the use of test equipment for optical target tracking equipment, technology for the use of test equipment for optical target acquisition equipment, technology for the use of test equipment for laser range finder, technology for the use of software for the use of test equipment for missile jamming equipment, technology for the use of software for the use of test equipment for optical target designator equipment, technology for the use of software for the use of test equipment for optical target tracking equipment, technology for the use of software for the use of test equipment for optical target acquisition equipment, technology for the use of software for the use of test equipment for laser range finder, test equipment for laser range finder, test equipment for missile jamming equipment, test equipment for optical target designator equipment, test equipment for optical target tracking equipment, test equipment for optical target acquisition equipment
8	P	firing sets, components for firing sets
9	P	equipment for the use of weapon sights, weapon sights, components for weapon sights, technology for the production of equipment for the use of weapon sights, technology for the production of weapon sights, technology for the production of components for weapon sights, technology for the use of equipment for the use of weapon sights, technology for the use of weapon sights, technology for the use of components for weapon sights
10	P	software for optimising equipment designs
11	P	military aircraft pressure refuellers, test equipment for military aircraft pressure refuellers
12	P	airborne refuelling equipment, components for airborne refuelling equipment, components for combat aircraft, components for combat helicopters, components for military search and rescue

		aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
13	P	command communications control and intelligence software
14	T	military surveillance aircraft
15	P	components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, components for military aero-engines, general military aircraft components, military aircraft navigation equipment, general military vehicle components, general naval vessel components, military electronic equipment, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
16	P	aerial target equipment, components for aerial target equipment, missile scoring equipment, components for missile scoring equipment
17	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
18	P	unmanned air vehicles, unmanned air vehicle control/handling/launching/support equipment, components for unmanned air vehicles, components for unmanned air vehicle control/handling/launching/support equipment
19	P	technology for the use of weapon sights, technology for the use of weapon night sights, technology for the use of components for weapon sights, technology for the use of components for weapon night sights, weapon sights, components for weapon sights, weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of components for weapon sights, technology for the use of weapon sights, components for military image intensifier equipment
20	P	aircraft military communications equipment
21	P	components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, military aircraft head-down displays, components for military aircraft head-down displays, general military aircraft components, military aircraft head-up displays, components for military aircraft head-up displays, military electronic equipment, components for military electronic equipment, military video recording equipment, components for military video recording equipment, components for combat helicopters, air to surface rockets launching equipment, components for air to surface rockets launching equipment, night vision goggles, components for night vision goggles, military aircraft ground equipment, components for military aircraft ground equipment, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military utility aircraft, test equipment for military head-down displays, test equipment for military head-up displays, test equipment for military electronic equipment, test equipment for military video recording equipment, test equipment for combat helicopters, test equipment for night vision goggles, test equipment for military aircraft ground equipment, test equipment for air to surface rocket launching equipment

16	P	software for optimising equipment designs
17	P	military aircraft pressure refuellers, test equipment for military aircraft pressure refuellers
18	P	airborne refuelling equipment, components for airborne refuelling equipment, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
19	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
20	P	castings for air to surface missiles

21	P	command communications control and intelligence software
22	T	military surveillance aircraft
23	P	components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, components for military aero-engines, general military aircraft components, military aircraft navigation equipment, general military vehicle components, general naval vessel components, military electronic equipment, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
24	P	airborne electronic warfare equipment, components for airborne electronic warfare equipment, airborne navigation equipment, components for airborne navigation equipment, airborne surveillance equipment, components for airborne surveillance equipment, airborne targeting equipment, components for airborne targeting equipment, military aircraft flight data recorders, airborne refuelling equipment, components for airborne refuelling equipment, aircraft radars, optical target designator equipment, optical target tracking equipment, optical target surveillance equipment, optical target acquisition equipment, attack alerting/warning equipment, electronic countermeasures equipment, laser warning detectors, bombing computers, fire control equipment, weapon control systems, combat aircraft simulators, components for combat aircraft simulators, combat aircraft training equipment, components for combat aircraft training equipment, military cameras, military photographic equipment, military image intensifier equipment, military infrared/thermal imaging equipment, military video recording equipment, sensor data recorders, technology for the development/production of combat aircraft, command communications control and intelligence software, software for the development of weapon system software, software for the monitoring of weapon system software, software for the maintenance of weapon system software, software for the maintenance of weapon system software, software for the modelling of weapon systems, software for the simulation of weapon systems, software for the evaluation of weapon systems, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, components for combat aircraft, components for military training aircraft, ejector seats, liquid oxygen converters, military aircraft pressurised breathing equipment, components for ejector seats, components for liquid oxygen converters, components for military aircraft pressurised breathing equipment, environmental test facilities for combat aircraft, military aero-engines, components for military aero-engines, military aircraft ground equipment, components for military aircraft ground equipment, military parachutes, components for military parachutes, production equipment for combat aircraft, test equipment for combat aircraft, production technology for combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft
25	P	components for combat aircraft, components for combat helicopters, components for military aero-engines, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, general military aircraft components
26	P	aerial target equipment, components for aerial target equipment
27	P	technology for the use of ejection seats, technology for the use of military aircraft ground equipment, technology for the use of military parachutes, technology for the use of military distress signalling equipment, components for combat aircraft, ejector seats, components for ejector seats, military aircraft ground equipment, components for military aircraft ground equipment, military distress signalling equipment, components for military distress signalling equipment, military parachutes, components for military parachutes
28	P	forgings for military aero-engines, forgings for combat aircraft, unfinished products for military aero-engines, unfinished products for combat aircraft, castings for military aero-engines, castings for combat aircraft
29	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
30	P	unmanned air vehicles, unmanned air vehicle control/handling/launching/support equipment, components for unmanned air vehicles, components for unmanned air vehicle

		control/handling/launching/support equipment
31	P	components for military aero-engines, components for naval engines, general military aircraft components
32	P	technology for the use of weapon sights, technology for the use of weapon night sights, technology for the use of components for weapon sights, technology for the use of components for weapon night sights, weapon sights, components for weapon sights, weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of components for weapon sights, technology for the use of weapon sights, components for military image intensifier equipment
33	P	software for the production of air to surface missiles, software for the use of air to surface missiles, technology for the production of air to surface missiles, technology for the use of air to surface missiles, components for air to surface missile training equipment, components for air to surface missiles, components for air to surface missile training equipment, military containers, components for military containers, surface missiles, components for air to surface missiles training equipment, surface missiles, technology for the use of air to surface missiles
34	P	aircraft military communications equipment
35	P	software for the evaluation of weapon systems, software for the simulation of weapon systems, software for the simulation of military operation scenarios, technology for the use of software for the simulation of military operation scenarios, technology for the use of software for the evaluation of weapon systems, technology for the use of software for the simulation of weapon systems
36	P	components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, military aircraft head-down displays, components for military aircraft head-down displays, general military aircraft components, military aircraft head-up displays, components for military aircraft head-up displays, military electronic equipment, components for military electronic equipment, military video recording equipment, components for military video recording equipment, components for combat helicopters, air to surface rockets launching equipment, components for air to surface rockets launching equipment, night vision goggles, components for night vision goggles, military aircraft ground equipment, components for military aircraft ground equipment, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military utility aircraft, test equipment for military head-down displays, test equipment for military head-up displays, test equipment for military electronic equipment, test equipment for military video recording equipment, test equipment for combat helicopters, test equipment for night vision goggles, test equipment for military aircraft ground equipment, test equipment for air to surface rocket launching equipment

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £ 100,000
---	---------------------

Number of SIELs issued covering:	
Items on the Military List	1
Other items	0
Military List and other items	0
Total number of SIELs issued	1

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

body armour*
components for body armour*

* the goods on these licences were for humanitarian end use

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	equipment employing cryptography
2	P	firing sets, improvised explosive device disposal equipment

Germany

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 2.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	30
Other items	2
Military List and other items	0

Total number of SIELs issued	32
------------------------------	----

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- air guns (1)
- T armoured all wheel drive vehicles
- Chaff (3 licences)
- chemical agent detection equipment
- T chemical agent detection equipment (2 licences)
- component for military communications equipment
- components for chain guns
- components for explosive ordnance disposal equipment
- components for guided missile decoying equipment
- components for large calibre artillery
- components for military aero-engines (4 licences)
- components for military infrared/thermal imaging equipment
- components for military transport aircraft
- components for periscopes (3 licences)
- components for stun grenades
- decoy flares
- devices containing military pyrotechnic materials
- equipment for the development of command communications control and intelligence
- equipment for the use of chain guns
- equipment for the use of military communications equipment
- improvised explosive device detection equipment (2 licences)
- inert decoy flares
- inert smoke cannisters
- military communications equipment (2 licences)
- military devices for initiating explosives
- nuclear grade graphite
- production equipment for general purpose machine guns
- shotguns (1) (2 licences)
- smoke cannisters
- technology for the use of chaff equipment
- technology for the use of decoy flares
- technology for the use of guided missile decoying equipment
- technology for the use of military communications equipment
- T unfinished products for military aircraft head-up displays
- weapon cleaning kits
- weapon sight mounts

STANDARD INDIVIDUAL EXPORT LICENCES - INCORPORATION

Total value of SIEL applications for which a licence was issued	£ 0.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	7
Other items	0
Military List and other items	0
Total number of SIELs issued	7

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- chaff
- components for military aero-engines
- components for military training aircraft
- components for periscopes (2 licences)
- components for surface to air missiles
- components for test equipment for military aero-engines

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary

1	P	technology for the use of unmanned air vehicles, technology for the development of unmanned air vehicles, technology for the production of unmanned air vehicles, technology for the use of unmanned air vehicle control/handling/launching/support equipment,
2	P	uranium isotope separation equipment, components for uranium isotope separation
3	P	components for combat aircraft, components for military training aircraft, components for military utility helicopters, components for military transport aircraft
4	P	components for military surveillance aircraft, technology for the use of components for military surveillance aircraft, components for combat aircraft, technology for the use of components for combat aircraft
5	P	technology for the production of components for biological agent detection equipment, technology for the production of components for chemical agent detection equipment
6	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, chemical agent detection equipment training equipment, components for chemical agent detection equipment training equipment, military electronic equipment, components for military electronic equipment, biological agent detection equipment, components for biological agent detection equipment, improvised explosive device detection equipment, components for improvised explosive device detection equipment, software for the use of biological agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of improvised explosive device detection equipment, technology for the use of biological agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of improvised explosive device detection equipment, test equipment for biological agent detection equipment, test equipment for chemical agent detection equipment, test equipment for military electronic equipment, test equipment for improvised explosive device detection equipment, equipment for the use of biological agent detection equipment, equipment for the use of chemical agent detection equipment, equipment for the use of military electronic equipment, equipment for the use of improvised explosive device detection equipment
7	P	components for air to air missile launching equipment, components for air to surface missile launching equipment, components for combat aircraft
8	P	demolition charges, equipment for the use of demolition charges, explosives
9	P	software for the use of test equipment for missile jamming equipment, software for the use of test equipment for optical target designator equipment, software for the use of test equipment for optical target tracking equipment, software for the use of test equipment for optical target acquisition equipment, software for the use of test equipment for laser range finder, technology for the use of test equipment for missile jamming equipment, technology for the use of test equipment for optical target designator equipment, technology for the use of test equipment for optical target tracking equipment, technology for the use of test equipment for optical target acquisition equipment, technology for the use of test equipment for laser range finder, technology for the use of software for the use of test equipment for missile jamming equipment, technology for the use of software for the use of test equipment for optical target designator equipment, technology for the use of software for the use of test equipment for optical target tracking equipment, technology for the use of software for the use of test equipment for optical target acquisition equipment, technology for the use of software for the use of test equipment for laser range finder, test equipment for laser range finder, test equipment for missile jamming equipment, test equipment for optical target designator equipment, test equipment for optical target tracking equipment, test equipment for optical target acquisition equipment
10	P	components for surface to air missiles, components for surface to air missiles control equipment, components for surface to air missiles handling equipment, components for surface to air missiles launching equipment, unfinished products for surface to air missiles, unfinished products for surface to air missiles control equipment, unfinished products surface to air missiles handling equipment, unfinished products surface to air missiles launching equipment
11	T	components for military transport aircraft, technology for the use of military transport aircraft
12	P	equipment for the use of weapon sights, weapon sights, components for weapon sights, technology for the production of equipment for the use of weapon sights, technology for the production of weapon sights, technology for the production of components for weapon sights, technology for the use of equipment for the use of weapon sights, technology for the use of weapon sights, technology for the use of components for weapon sights
13	P	components for air to air missiles
14	P	software for optimising equipment designs
15	P	military aircraft pressure refuellers, test equipment for military aircraft pressure refuellers
16	P	airborne refuelling equipment, components for airborne refuelling equipment, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, technology for the use of combat aircraft,

		technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
17	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
18	P	command communications control and intelligence software
19	P	technology for the development, production or use of goods specified on Cat 0
20	T	military surveillance aircraft
21	P	components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, components for military aero-engines, general military aircraft components, military aircraft navigation equipment, general military vehicle components, general naval vessel components, military electronic equipment, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
22	P	aircraft cannon ammunition, training aircraft cannon ammunition, large calibre artillery ammunition, blank ammunition, components for training large calibre artillery ammunition, components for large calibre artillery ammunition, components for smoke ammunition, components for pyrotechnic ammunition, components for large calibre artillery ammunition, components for smoke ammunition, components for pyrotechnic ammunition, components for training large calibre artillery ammunition
23	P	components for combat aircraft, components for combat helicopters, components for military aero-engines, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, general military aircraft components
24	P	aerial target equipment, components for aerial target equipment
25	P	forgings for military aero-engines, forgings for combat aircraft, unfinished products for military aero-engines, unfinished products for combat aircraft, castings for military aero-engines, castings for combat aircraft
26	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
27	P	unmanned air vehicles, unmanned air vehicle control/handling/launching/support equipment, components for unmanned air vehicles, components for unmanned air vehicle control/handling/launching/support equipment
28	P	components for military aero-engines, components for naval engines, general military aircraft components
29	P	technology for the use of weapon sights, technology for the use of weapon night sights, technology for the use of components for weapon sights, technology for the use of components for weapon night sights, weapon sights, components for weapon sights, weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of components for weapon sights, technology for the use of weapon sights, components for military image intensifier equipment
30	P	aircraft military communications equipment
31	T	Inertial equipment
32	P	components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, military aircraft head-down displays, components for military aircraft head-down displays, general military aircraft components, military aircraft head-up displays, components for military aircraft head-up displays, military electronic equipment, components for military electronic equipment, military video recording equipment, components for military video recording equipment, components for combat helicopters, air to surface rockets launching equipment, components for air to surface rockets launching equipment, night vision goggles, components for night vision goggles, military aircraft ground equipment,

		components for military aircraft ground equipment, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military utility aircraft, test equipment for military head-down displays, test equipment for military head-up displays, test equipment for military electronic equipment, test equipment for military video recording equipment, test equipment for combat helicopters, test equipment for night vision goggles, test equipment for military aircraft ground equipment, test equipment for air to surface rocket launching equipment

Military List and other items	0
Total number of SIELs issued	14

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- anti-aircraft ammunition
- ballistic shields
- body armour
- components for military infrared/thermal imaging equipment
- cryptographic software (3 licences)
- deuterium mixtures
- fibrous/filamentary materials
- general naval vessel components
- human pathogens
- military firing sets
- naval mines
- NBC respirators
- sporting gun ammunition

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	T	inertial equipment, components for inertial equipment, technology for the use of inertial equipment, technology for the use of components for inertial equipment
2	P	equipment employing cryptography
3	P	sporting gun ammunition
4	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
5	P	equipment employing cryptography

Hungary

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £ 100,000
---	---------------------

Number of SIELs issued covering:	
Items on the Military List	3
Other items	0
Military List and other items	0
Total number of SIELs issued	3

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- aircraft military communications equipment
- body armour
- components for aircraft military communications equipment
- equipment for the use of chemical agent detection equipment

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapon sights, technology for the use of weapon sights
2	P	command communications control and intelligence software
3	T	technology for the use of military training aircraft, military training aircraft, technology for the use of aerial target equipment, aerial target equipment, components for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, technology for the use of airborne electronic warfare equipment, technology for the use of use of electronic countermeasures equipment, technology for the use of airborne electronic warfare equipment training equipment, airborne electronic warfare equipment training equipment, airborne electronic warfare equipment, electronic countermeasures equipment, equipment for the use of airborne electronic warfare equipment, equipment for the use of electronic countermeasures equipment
4	P	components for combat aircraft, components for military aircraft pressurised breathing equipment

Iceland

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 18.5m
---	---------

Number of SIELs issued covering:	
Items on the Military List	109
Other items	82
Military List and other items	1
Total number of SIELs issued	192

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- accessories for instrumentation cameras (2 licences)
- accessories for materials analysis equipment
- accessories for photomultiplier tubes (2 licences)
- accessories for spectrophotometers
- accessories for vacuum systems
- aircraft military communications equipment
- anti-friction bearings
- T bomb suits
- chemical agent detection equipment
- chemicals used for semiconductor production
- clothing treated for signature suppression for military use
- combat aircraft simulators (2 licences)
- T command communications control and intelligence software
- components for aero-engines
- components for airborne radars
- components for biotechnology equipment
- components for civil aircraft (3 licences)
- components for combat aircraft (22 licences)
- components for ejector seats
- components for electronic warfare equipment (3 licences)
- components for frigates
- components for gas detection equipment
- components for gas lasers
- components for general laboratory equipment
- components for ground based radars (9 licences)
- components for ground vehicle military communications equipment
- components for materials testing equipment
- components for military aero-engines (11 licences)
- components for military aircraft navigation equipment (2 licences)
- components for military aircraft pressurised breathing equipment
- components for military communications equipment (6 licences)
- components for military training aircraft (6 licences)
- components for military transport aircraft (2 licences)
- components for military utility helicopters (5 licences)
- components for munitions launching equipment
- components for naval electronic equipment
- components for naval engines (3 licences)
- components for naval radars (3 licences)
- components for photomultiplier tubes (2 licences)
- components for pumps
- components for semiconductor process equipment
- components for spectrophotometers
- components for valves
- computer analogue to digital equipment
- corrosion resistant chemical manufacturing equipment (3 licences)
- cryogenic equipment
- digital computers
- digital signal processing equipment (2 licences)
- T direct view imaging equipment
- electronic components
- electronic warfare equipment
- T equipment employing cryptography
- equipment for the development of military aero-engines
- equipment for the use of military communications equipment
- equipment for the use of instrumentation cameras
- fast switching modules
- fasteners/fixings (3 licences)

ferrous alloys (2 licences)
 ferrous metals
 fibre prepregs
 gas detection equipment
 general industrial production equipment (2 licences)
 general military aircraft components (4 licences)
 goods treated for signature suppression for military use
 ground based radars
 ground vehicle military communications equipment (2 licences)

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	T	submersible equipment, underwater electronic imaging systems, imaging cameras
2	T	marine position fixing equipment, bathymetric survey systems
3	P	items for the support of military training aircraft as specified by the following entries on schedule 1 part 1 of the order : ML4bl; ML5; ML10,a,b,d,e,f,g,h,i; ML11; ML14; ML15; ML16, PL5020; ML17c,f,h,l,n; PL5017; ML21a; ML21b1a,b,c,d, ML21b3; ML21c; ML22a
4	T	inertial equipment, components for inertial equipment, technology for the use of inertial equipment, technology for the use of components for inertial equipment
5	P	equipment employing cryptography
6	P	components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military utility helicopters, general military aircraft components, technology for the use of general military aircraft
7	P	components for military utility helicopters, technology for the use of components for military utility helicopters, components for military training aircraft, technology for the use of components for military training aircraft,
8	P	equipment for the use of general naval vessel components, general naval vessel components, technology for the use of general naval vessel components, technology for the use of equipment for the use of general naval vessel components
9	P	firing sets, components for firing sets
10	P	naval shock mounts, components for naval shock mounts
11	P	civil body armour
12	P	technology for the development of components for unmanned air vehicle handling equipment, technology for the production of components for unmanned air vehicle handling equipment, technology for the use of components for unmanned air vehicle handling equipment, technology for the development of unmanned air vehicle handling equipment, technology for the production of unmanned air vehicle handling equipment, technology for the use of unmanned air vehicle handling equipment
13	P	airborne refuelling equipment, components for airborne refuelling equipment, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
14	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
15	T	military flying helmets, components for military flying helmets, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, aircrew protective masks, components for aircrew protective masks, aircraft military communications equipment, components for military aircraft communications equipment, military electronic equipment, components for military electronic equipment
16	P	bathymetric survey systems, marine position fixing equipment, magnetometers, inertial equipment
17	P	equipment employing cryptography
18	P	airborne electronic warfare equipment, components for airborne electronic warfare equipment, airborne navigation equipment, components for airborne navigation equipment, airborne surveillance equipment, components for airborne surveillance equipment, airborne targeting equipment, components for airborne targeting equipment, military aircraft flight data recorders, airborne refuelling equipment, components for airborne refuelling equipment, aircraft radars, optical target designator equipment, optical target tracking equipment, optical target surveillance equipment, optical target acquisition equipment, attack alerting/warning equipment, electronic countermeasures equipment, laser warning detectors, bombing computers, fire control equipment, weapon control systems, combat aircraft simulators, components for combat aircraft simulators, combat aircraft training equipment, components for combat aircraft training equipment, military cameras, military photographic equipment, military image intensifier equipment, military infrared/thermal imaging equipment, military video recording equipment, sensor data recorders, technology for the development/production of combat aircraft, command communications control and intelligence software, software for the development of weapon system software, software for the monitoring of weapon system software, software for the maintenance of weapon system software, software for the maintenance of weapon system software, software for the modelling of weapon systems, software for the simulation of weapon systems, software for the evaluation of weapon systems, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, components for combat aircraft, components for military training aircraft,

		ejector seats, liquid oxygen converters, military aircraft pressurised breathing equipment, components for ejector seats, components for liquid oxygen converters, components for military aircraft pressurised breathing equipment, environmental test facilities for combat aircraft, military aero-engines, components for military aero-engines, military aircraft ground equipment, components for military aircraft ground equipment, military parachutes, components for military parachutes, production equipment for combat aircraft, test equipment for combat aircraft, production technology for combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft
19	P	components for combat aircraft, components for combat helicopters, components for military aero-engines, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, general military aircraft components
20	P	technology for the development of ejector seats, technology for the production of ejector seats, technology for the use of ejector seats, technology for the use of military distress signalling equipment, technology for the use of military aircraft ground equipment, technology for the production of military parachutes, technology for the use of military parachutes, components for combat aircraft, components for ejector seats, ejector seats, military aircraft ground equipment, military distress signalling equipment, components for military distress signalling equipment, military parachutes
21	P	components for combat aircraft, components for military utility helicopters, components for military utility aircraft, components for military training aircraft, general military aircraft components
22	P	components for combat aircraft, component/components for military training aircraft, component/components for military transport aircraft, component/components for military utility helicopters
23	P	aircraft military communications equipment
24	P	Goods specified by the following entries of the EoG, ToT&PoTA(C)O: ML4b, ML5, ML10a,b,d,e,f,g & h, ML11, ML14, ML15, ML16, ML17c,f,h,j,k,l & n, PL5017, ML21a & b3 and ML22 a & b
25	P	equipment for operation of military aircraft on confined areas, components for equipment for operation of military aircraft on confined areas, general naval vessel components, components for aircraft carriers, general naval vessel components, equipment for operation of military aircraft on confined areas, components for equipment for operation of military aircraft on confined areas, technology for the use of general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for submarines, technology for the use of equipment for operation of aircraft on confined areas, technology for the use of components for mine sweepers

Exports to Iraq are subject to an arms embargo imposed by UN Security Council Resolution 661 (6 August 1990). Security Council Resolution 1546 (8 June 2004) provides an exemption to the arms embargo for arms and related material required by the Government of Iraq or the multinational force to serve the purposes of Resolution 1546. The more general trade sanctions imposed under SCR 661 were revoked in May 2003 by Security Council Resolution 1483. The arms embargo is implemented in UK legislation by the Iraq (United Nations Sanctions) Order 2003 (Statutory Instrument 2003 No. 1519).

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 250,000
---	-----------

Number of SIELs issued covering:	
Items on the Military List	5
Other items	0

Military List and other items	0
Total number of SIELs issued	5

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

equipment for the use of military firing sets
exploding simulation devices
illuminators
military devices for initiating explosives
military firing sets
small arms ammunition
smoke hand grenades
sporting gun ammunition (2 licences)
thunderflashes
training hand grenades

Number of SIELs refused covering:	
Items on the Military List	1
Other items	0
Military List and other items	0
Total number of SIELs refused	1

Rating	ML1	PL5017
No of SIELS covering items with this rating	1	1

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.

Japan

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 45.0m
---	---------

Number of SIELs issued covering:	
Items on the Military List	15
Other items	2
Military List and other items	0
Total number of SIELs issued	17

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

air guns (2200)
chemical agent detection equipment
T chemical agent detection equipment
components for chemical agent detection equipment
T components for chemical agent detection equipment
components for combat aircraft
components for ground based radars (2 licences)
components for military search and rescue aircraft
components for unmanned air vehicles
deactivated assault rifles (6)
deactivated general purpose machine guns (30)
deactivated heavy machine guns (1)
deactivated shotguns (5)
deactivated submachine guns (13)

enriched uranium
equipment for the use of artillery computers
materials containing enriched uranium
materials for reduced electromagnetic reflectivity for military use
military electronic equipment
technology for the development of components for military communications equipment
technology for the production of military infrared/thermal imaging equipment

STANDARD INDIVIDUAL EXPORT LICENCES - INCORPORATION

Kuwait

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 2.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	12
Other items	4
Military List and other items	1
Total number of SIELs issued	17

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- body armour (2 licences)
- chemicals used for analytical or materials testing
- chemicals used for building materials production
- components for body armour
- T components for military communications equipment
- components for military utility helicopters (4 licences)
- components for surface to air missiles launching equipment
- corrosion resistant chemical manufacturing equipment
- T equipment employing cryptography
- T equipment for the use of military communications equipment
- T equipment for the use of remote ground sensor systems
- T improvised explosive device jamming equipment
- T laser range finders
- T military communications equipment
- military helmets (2 licences)
- T military image intensifier equipment
- T military infrared/thermal imaging equipment

- T mortar bombs
- T night vision goggles
- pyrotechnic ammunition
- T remote ground sensor systems
- smoke hand grenades
- T software for the use of equipment employing cryptography
- T software for the use of military communications equipment
- T software for the use of remote ground sensor systems
- T weapon day and night sights
- T weapon night sights
- T weapon sight mounts

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	components for military training aircraft simulators
2	P	items for the support of military training aircraft as specified by the following entries on schedule 1 part 1 of the order : ML4bl; ML5; ML10,a,b,d,e,f,g,h,i; ML11; ML14; ML15; ML16, PL5020; ML17c,f,h,l,n; PL5017; ML21a; ML21b1a,b,c,d, ML21b3; ML21c; ML22a
3	T	inertial equipment, components for inertial equipment, technology for the use of inertial equipment, technology for the use of components for inertial equipment
4	P	inertial equipment
5	P	components for military transport aircraft, technology for the use of components for military transport aircraft, components for combat aircraft, technology for the use of components for combat aircraft
6	P	chemical agent detection equipment training equipment, chemical agent detection equipment, components for chemical agent detection equipment, test equipment for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, chemical agent detection equipment training equipment, components for chemical agent detection equipment training equipment, military electronic equipment, components for military electronic equipment, biological agent detection equipment, components for biological agent detection equipment, software for the use of chemical agent detection equipment, software for the use of biological agent detection equipment, software for the use of test equipment for chemical agent detection equipment, software for the use of equipment for the use of chemical agent detection equipment, software for the use of chemical agent detection equipment training equipment, software for the use military electronic equipment, technology for the use of biological agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of components for biological agent detection equipment, technology for the use of components for chemical agent detection equipment, technology for the use of test equipment for the use of chemical agent detection equipment, technology for the use of components for test equipment for the use of chemical agent detection equipment, technology for the use of equipment for the use of chemical agent detection equipment, technology for the use of components for equipment for the use of chemical agent detection equipment, technology for the use of chemical agent detection equipment training equipment, technology for the use of components for chemical agent detection equipment training equipment, technology for the use of military electronic equipment, technology for the use of components for military equipment, test equipment for chemical agent detection equipment, test equipment for biological agent detection equipment, test equipment for military electronic equipment, test equipment for test equipment for chemical agent detection equipment, test equipment for chemical agent detection equipment training equipment, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment, equipment for the use of test equipment for chemical agent detection equipment, equipment for the use of chemical agent detection equipment training equipment, improvised explosive device detection equipment, components for improvised explosive device detection equipment, technology for the use of improvised explosive device detection equipment, technology for the use of components for improvised explosive device detection equipment
7	P	sporting gun ammunition
8	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapon sights, technology for the use of weapon sights
9	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
10	T	military flying helmets, components for military flying helmets, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, aircrew protective masks, components for aircrew protective masks, aircraft military communications equipment, components for military aircraft communications equipment, military electronic equipment, components for military electronic equipment

11	P	command communications control and intelligence software
12	T	inertial equipment
13	P	mixtures containing toxic chemical precursors
14	P	aerial target equipment, components for aerial target equipment
15	P	technology for the use of weapon sights, technology for the use of weapon night sights, technology for the use of components for weapon sights, technology for the use of components for weapon night sights, weapon sights, components for weapon sights, weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of components for weapon sights, technology for the use of weapon sights, components for military image intensifier equipment
16	P	Goods specified by the following entries of the EoG, ToT&PoTA(C)O: ML4b, ML5, ML10a,b,d,e,f,g & h, ML11, ML14, ML15, ML16, ML17c,f,h,j,k,l & n, PL5017, ML21a & b3 and ML22 a & b

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	T	inertial equipment, components for inertial equipment, technology for the use of inertial equipment, technology for the use of components for inertial equipment
2	P	inertial equipment
3	P	sporting gun ammunition
4	P	equipment employing cryptography

Mexico

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 3.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	2
Other items	2
Military List and other items	0
Total number of SIELs issued	4

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

components for armoured fighting vehicles
 equipment employing cryptography
 mass spectrometers
 shotguns (4)

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	T	submersible equipment, underwater electronic imaging systems, imaging cameras
2	T	marine position fixing equipment, bathymetric survey systems
3	T	inertial equipment, components for inertial equipment, technology for the use of inertial equipment, technology for the use of components for inertial equipment
4	P	equipment employing cryptography
5	P	naval radars, components for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars, test equipment for naval radars, military navigation equipment, components for military navigation equipment, test equipment for military navigation equipment, technology for the use of military navigation equipment, technology for the use of test equipment for military navigation equipment, military navigation equipment, components for military navigation equipment,
6	P	body armour, bomb suits, components for body armour, military helmets, ballistic shields, constructions for ballistic protection of military systems
7	P	bathymetric survey systems, marine position fixing equipment, magnetometers, inertial equipment
8	T	inertial equipment
9	P	equipment employing cryptography
10	P	equipment employing cryptography
11	P	technology for the use of weapon sights, technology for the use of weapon night sights, technology for the use of components for weapon sights, technology for the use of components for weapon night sights, weapon sights, components for weapon sights, weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of components for weapon sights, technology for the use of weapon sights, components for military image intensifier equipment
12	T	inertial equipment

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £ 100,000
---	---------------------

Number of SIELs issued covering:	
Items on the Military List	0
Other items	1
Military List and other items	0
Total number of SIELs issued	1

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

improvised explosive device detection equipment

Mongolia

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £ 100,000
---	---------------------

Number of SIELs issued covering:	
Items on the Military List	1
Other items	0
Military List and other items	0
Total number of SIELs issued	1

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

military cargo vehicles

Morocco

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 2.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	2
Other items	3
Military List and other items	0
Total number of SIELs issued	5

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

blank ammunition
components for combat aircraft
equipment employing cryptography (2 licences)
gyro-astro compasses
remote sensing imaging sensors
technology for the use of gyro-astro compasses
technology for the use of remote sensing imaging sensors

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary

1	T	marine position fixing equipment, bathymetric survey systems
2	P	equipment employing cryptography
3	P	inertial equipment
4	P	components for military training aircraft, technology for the use of components for military training aircraft, components for combat helicopters, technology for the use of components for combat helicopters, components for military transport aircraft, technology for the use of components for military transport aircraft, components for combat aircraft, technology for the use of components for combat aircraft
5	P	body armour, bomb suits, components for body armour, military helmets, ballistic shields, constructions for ballistic protection of military systems

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 2.0m
---	--------

Number of SIELs issued covering:	
Items on the Military List	14
Other items	2
Military List and other items	0
Total number of SIELs issued	16

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- ammunition for wall and door breaching projectile launchers
- anti-riot shields
- components for devices containing military pyrotechnic materials
- components for guided missile decoying equipment
- components for military aero-engines
- components for military communications equipment (2 licences)
- T components for military improvised explosive device disposal equipment
- components for military utility helicopters
- T equipment for the use of military improvised explosive device disposal equipment
- general military vehicle components
- linear cutting explosive charges
- T military improvised explosive device disposal equipment
- military infrared/thermal imaging equipment
- NBC respirators
- non-sporting shotgun ammunition
- sporting gun ammunition (3 licences)
- tear gas/irritant ammunition (2 licences)
- uranium isotope separation equipment

STANDARD INDIVIDUAL EXPORT LICENCES - INCORPORATION

Total value of SIEL applications for which a licence was issued	£ 250,000
---	-----------

Number of SIELs issued covering:	
Items on the Military List	3
Other items	0
Military List and other items	0
Total number of SIELs issued	3

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

components for military transport aircraft
 components for naval radars
 forgings for naval engines

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	uranium isotope separation equipment, components for uranium isotope separation
2	P	components for armoured fighting vehicles, components for military utility helicopters
3	P	components for military utility helicopters, technology for the use of components for military utility helicopters, components for combat aircraft, technology for the use of components for combat aircraft, components for military transport aircraft, technology for the use of components for military transport aircraft, components for military surveillance aircraft, technology for the use of components for military surveillance aircraft
4	P	technology for the production of components for biological agent detection equipment, technology for the production of components for chemical agent detection equipment
5	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, chemical agent detection equipment training equipment, components for chemical agent detection equipment training equipment, military electronic equipment, components for military electronic equipment, biological agent detection equipment, components for biological agent detection equipment, improvised explosive device detection equipment, components for improvised explosive device detection equipment, software for the use of biological agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of improvised explosive device detection equipment, technology for the use of biological agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of improvised explosive device detection equipment, test equipment for biological agent detection equipment, test equipment for chemical agent detection equipment, test equipment for military electronic equipment, test equipment for improvised explosive device detection equipment, equipment for the use of biological agent detection equipment, equipment for the use of chemical agent detection equipment, equipment for the use of military electronic equipment, equipment for the use of improvised explosive device detection equipment
6	P	components for air to air missile launching equipment, components for air to surface missile launching equipment, components for combat aircraft
7	P	demolition charges, equipment for the use of demolition charges, explosives
8	P	software for the use of test equipment for missile jamming equipment, software for the use of test equipment for optical target designator equipment, software for the use of test equipment for optical target tracking equipment, software for the use of test equipment for optical target acquisition equipment, software for the use of test equipment for laser range finder, technology for the use of test equipment for missile jamming equipment, technology for the use of test equipment for optical target designator equipment, technology for the use of test equipment for optical target tracking equipment, technology for the use of test equipment for optical target acquisition equipment, technology for the use of test equipment for laser range finder, technology for the use of software for the use of test equipment for missile jamming equipment, technology for the use of software for the use of test equipment for optical target designator equipment, technology for the use of software for the use of test equipment for optical target tracking equipment, technology for the use of software for the use of test equipment for optical target acquisition equipment, technology for the use of software for the use of test equipment for laser range finder, test equipment for laser range finder, test equipment for missile jamming equipment, test equipment for optical target designator equipment, test equipment for optical target tracking equipment, test equipment for optical target acquisition equipment
9	P	components for surface to air missiles, components for surface to air missiles control equipment, components for surface to air missiles handling equipment, components for surface to air missiles launching equipment, unfinished products for surface to air missiles, unfinished products for surface to air missiles control equipment, unfinished products surface to air missiles handling equipment, unfinished products surface to air missiles launching equipment
10	P	equipment for the use of weapon sights, weapon sights, components for weapon sights, technology for the production of equipment for the use of weapon sights, technology for the production of weapon sights, technology for the production of components for weapon sights, technology for the use of equipment for the use of weapon sights, technology for the use of weapon sights, technology for the use of components for weapon sights
11	P	military aircraft pressure refuellers, test equipment for military aircraft pressure refuellers
12	P	body armour, bomb suits, components for body armour, military helmets, ballistic shields,

		constructions for ballistic protection of military systems
13	P	airborne refuelling equipment, components for airborne refuelling equipment, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
14	P	command communications control and intelligence software
15	P	technology for the development, production or use of goods specified on Cat 0
16	T	military surveillance aircraft
17	P	components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, components for military aero-engines, general military aircraft components, military aircraft navigation equipment, general military vehicle components, general naval vessel components, military electronic equipment, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
18	P	mortar bombs, smoke ammunition, pyrotechnic ammunition, large calibre artillery ammunition, components for large calibre artillery ammunition, components for smoke ammunition, components for pyrotechnic ammunition, components for training large calibre artillery ammunition
19	P	components for combat aircraft, components for combat helicopters, components for military aero-engines, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, general military aircraft components
20	P	aerial target equipment, components for aerial target equipment
21	P	forgings for military aero-engines, forgings for combat aircraft, unfinished products for military aero-engines, unfinished products for combat aircraft, castings for military aero-engines, castings for combat aircraft
22	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
23	P	components for tanker aircraft, components for military transport aircraft, components for military surveillance aircraft
24	P	unmanned air vehicles, unmanned air vehicle control/handling/launching/support equipment, components for unmanned air vehicles, components for unmanned air vehicle control/handling/launching/support equipment
25	P	technology for the use of weapon sights, technology for the use of weapon night sights, technology for the use of components for weapon sights, technology for the use of components for weapon night sights, weapon sights, components for weapon sights, weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of components for weapon sights, technology for the use of weapon sights, components for military image intensifier equipment
26	T	inertial equipment
27	P	components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, military aircraft head-down displays, components for military aircraft head-down displays, general military aircraft components, military aircraft head-up displays, components for military aircraft head-up displays, military electronic equipment, components for military electronic equipment, military video recording equipment, components for military video recording equipment, components for combat helicopters, air to surface rockets launching equipment, components for air to surface rockets launching equipment,

		night vision goggles, components for night vision goggles, military aircraft ground equipment, components for military aircraft ground equipment, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military utility aircraft, test equipment for military head-down displays, test equipment for military head-up displays, test equipment for military electronic equipment, test equipment for military video recording equipment, test equipment for combat helicopters, test equipment for night vision goggles, test equipment for military aircraft ground equipment, test equipment for air to surface rocket launching equipment

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 1.0m
---	--------

Number of SIELs issued covering:	
Items on the Military List	20
Other items	1
Military List and other items	0
Total number of SIELs issued	21

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- air guns (1)
- air guns (5)
- air rifles (1)
- body armour
- chemical agent detection equipment
- command communications control and intelligence software
- components for general purpose machine guns (3 licences)
- components for gun mountings
- components for large calibre artillery
- components for mortars (2 licences)
- components for NBC respirators
- components for smoke cannisters
- general purpose machine guns maintenance equipment
- goods treated for signature suppression for military use
- gun silencers
- military helmets
- NBC clothing (3 licences)
- NBC respirators
- shotguns (1) (3 licences)

signal flares
smoke cannisters
software to simulate the function of command communications control and intelligence
sporting rifles (1)
towed hydrophone arrays

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	Goods specified on Part 1 of Schedule 1 to "The Order", excluding: (1) Complete vehicles, vessels & aircraft; (2) Goods specified by PL5001; (3) Chemicals specified on the Chemical Weapons Convention (Schedule 1); (4) Equipment and components therefor for the dissemination of chemicals on (3) - as above; (5) Anti-personnel landmines and components therefor; (6) Goods specified on Category I of the Missile Technology Control Regime; (7) MANPADS and components therefor; (8) Components for Unmanned Airborne Vehicles; (9) Nuclear explosive devices and materials; (10) Enriched Boron; (11) Nuclear power generating or propulsion equipment; (12) Nuclear reactors; (13) Test models for the development of items listed above; (14) Equipment for the production of items listed above, and; (15) Software and technology for the development, production or use of items listed above
2	P	sporting gun ammunition, sporting rifles, combination rifle-shotguns, shotguns, small arms ammunition
3	P	components for military transport aircraft, technology for the use of components for military transport aircraft, components for military training aircraft, technology for the use of components for military training aircraft
4	P	technology for the production of components for biological agent detection equipment, technology for the production of components for chemical agent detection equipment
5	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, chemical agent detection equipment training equipment, components for chemical agent detection equipment training equipment, military electronic equipment, components for military electronic equipment, biological agent detection equipment, components for biological agent detection equipment, improvised explosive device detection equipment, components for improvised explosive device detection equipment, software for the use of biological agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of improvised explosive device detection equipment, technology for the use of biological agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of improvised explosive device detection equipment, test equipment for biological agent detection equipment, test equipment for chemical agent detection equipment, test equipment for military electronic equipment, test equipment for improvised explosive device detection equipment, equipment for the use of biological agent detection equipment, equipment for the use of chemical agent detection equipment, equipment for the use of military electronic equipment, equipment for the use of improvised explosive device detection equipment
6	P	components for air to air missile launching equipment, components for air to surface missile launching equipment, components for combat aircraft
7	P	demolition charges, equipment for the use of demolition charges, explosives
8	P	software for the use of test equipment for missile jamming equipment, software for the use of test equipment for optical target designator equipment, software for the use of test equipment for optical target tracking equipment, software for the use of test equipment for optical target acquisition equipment, software for the use of test equipment for laser range finder, technology for the use of test equipment for missile jamming equipment, technology for the use of test equipment for optical target designator equipment, technology for the use of test equipment for optical target tracking equipment, technology for the use of test equipment for optical target acquisition equipment, technology for the use of test equipment for laser range finder, technology for the use of software for the use of test equipment for missile jamming equipment, technology for the use of software for the use of test equipment for optical target designator equipment, technology for the use of software for the use of test equipment for optical target tracking equipment, technology for the use of software for the use of test equipment for optical target acquisition equipment, technology for the use of software for the use of test equipment for laser range finder, test equipment for laser range finder, test equipment for missile jamming equipment, test equipment for optical target designator equipment, test equipment for optical target tracking equipment, test equipment for optical target acquisition equipment
9	P	firing sets, components for firing sets
10	P	sporting gun ammunition
11	P	equipment for the use of weapon sights, weapon sights, components for weapon sights, technology

		for the production of equipment for the use of weapon sights, technology for the production of weapon sights, technology for the production of components for weapon sights, technology for the use of equipment for the use of weapon sights, technology for the use of weapon sights, technology for the use of components for weapon sights
12	P	body armour, bomb suits, components for body armour, military helmets, ballistic shields, constructions for ballistic protection of military systems
13	P	airborne refuelling equipment, components for airborne refuelling equipment, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
14	P	command communications control and intelligence software
15	P	components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, components for military aero-engines, general military aircraft components, military aircraft navigation equipment, general military vehicle components, general naval vessel components, military electronic equipment, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
16	P	aerial target equipment, components for aerial target equipment
17	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
18	P	components for military utility helicopters, components for military training aircraft
19	P	technology for the use of weapon sights, technology for the use of weapon night sights, technology for the use of components for weapon sights, technology for the use of components for weapon night sights, weapon sights, components for weapon sights, weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of components for weapon sights, technology for the use of weapon sights, components for military image intensifier equipment
20	P	components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, military aircraft head-down displays, components for military aircraft head-down displays, general military aircraft components, military aircraft head-up displays, components for military aircraft head-up displays, military electronic equipment, components for military electronic equipment, military video recording equipment, components for military video recording equipment, components for combat helicopters, air to surface rockets launching equipment, components for air to surface rockets launching equipment, night vision goggles, components for night vision goggles, military aircraft ground equipment, components for military aircraft ground equipment, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military utility aircraft, test equipment for military head-down displays, test equipment for military head-up displays, test equipment for military electronic equipment, test equipment for military video recording equipment, test equipment for combat helicopters, test equipment for night vision goggles, test equipment for military aircraft ground equipment, test equipment for air to surface rocket launching equipment

4	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, chemical agent detection equipment training equipment, components for chemical agent detection equipment training equipment, military electronic equipment, components for military electronic equipment, biological agent detection equipment, components for biological agent detection equipment, improvised explosive device detection equipment, components for improvised explosive device detection equipment, software for the use of biological agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of improvised explosive device detection equipment, technology for the use of biological agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of improvised explosive device detection equipment, test equipment for biological agent detection equipment, test equipment for chemical agent detection equipment, test equipment for military electronic equipment, test equipment for improvised explosive device detection equipment, equipment for the use of biological agent detection equipment, equipment for the use of chemical agent detection equipment, equipment for the use of military electronic equipment, equipment for the use of improvised explosive device detection equipment
5	P	demolition charges, equipment for the use of demolition charges, explosives
6	P	software for the use of test equipment for missile jamming equipment, software for the use of test equipment for optical target designator equipment, software for the use of test equipment for optical target tracking equipment, software for the use of test equipment for laser range finder, technology for the use of test equipment for missile jamming equipment, technology for the use of test equipment for optical target designator equipment, technology for the use of test equipment for optical target tracking equipment, technology for the use of test equipment for laser range finder, technology for the use of software for the use of test equipment for missile jamming equipment, technology for the use of software for the use of test equipment for optical target designator equipment, technology for the use of software for the use of test equipment for optical target tracking equipment, technology for the use of software for the use of test equipment for laser range finder, test equipment for laser range finder, test equipment for missile jamming equipment, test equipment for optical target designator equipment, test equipment for optical target tracking equipment, test equipment for optical target acquisition equipment
7	P	firing sets, components for firing sets
8	P	sporting gun ammunition
9	P	sporting rifles, components for sporting rifles, shotguns, components for shotguns, combination rifle-shotguns, components for combination rifle-shotguns, sporting gun ammunition
10	P	military aircraft pressure refuellers, test equipment for military aircraft pressure refuellers
11	P	body armour, bomb suits, components for body armour, military helmets, ballistic shields, constructions for ballistic protection of military systems
12	P	airborne refuelling equipment, components for airborne refuelling equipment, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment

13	P	command communications control and intelligence software
14	T	military surveillance aircraft
15	P	components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, components for military aero-engines, general military aircraft components, military aircraft navigation equipment, general military vehicle components, general naval vessel components, military electronic equipment, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
16	P	aerial target equipment, components for aerial target equipment
17	P	forgings for military aero-engines, forgings for combat aircraft, unfinished products for military aero-engines, unfinished products for combat aircraft, castings for military aero-engines, castings for combat aircraft
18	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
19	P	unmanned air vehicles, unmanned air vehicle control/handling/launching/support equipment, components for unmanned air vehicles, components for unmanned air vehicle control/handling/launching/support equipment
20	P	technology for the use of weapon sights, technology for the use of weapon night sights, technology for the use of components for weapon sights, technology for the use of components for weapon night sights, weapon sights, components for weapon sights, weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of components for weapon sights, technology for the use of weapon sights, components for military image intensifier equipment
21	P	aircraft military communications equipment
22	T	inertial equipment
23	P	components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, military aircraft head-down displays, components for military aircraft head-down displays, general military aircraft components, military aircraft head-up displays, components for military aircraft head-up displays, military electronic equipment, components for military electronic equipment, military video recording equipment, components for military video recording equipment, components for combat helicopters, air to surface rockets launching equipment, components for air to surface rockets launching equipment, night vision goggles, components for night vision goggles, military aircraft ground equipment, components for military aircraft ground equipment, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military utility aircraft, test equipment for military head-down displays, test equipment for military head-up displays, test equipment for military electronic equipment, test equipment for military video recording equipment, test equipment for combat helicopters, test equipment for night vision goggles, test equipment for military aircraft ground equipment, test equipment for air to surface rocket launching equipment

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 2.0m
---	--------

Number of SIELs issued covering:	
Items on the Military List	17
Other items	2
Military List and other items	0
Total number of SIELs issued	19

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- assault rifles (1)
- components for assault rifles
- components for combat aircraft
- components for large calibre artillery ammunition
- components for military aircraft pressurised breathing equipment
- components for military communications equipment
- T components for military improvised explosive device disposal equipment
- components for military training aircraft (2 licences)
- components for tanks (4 licences)
- decoy flares
- equipment employing cryptography
- T equipment for the use of military improvised explosive device disposal equipment
- general military vehicle components
- gun mountings
- T improvised explosive device jamming equipment
- T military electronic equipment
- T military improvised explosive device disposal equipment
- smoke ammunition
- software to simulate the function of forward observer/target recognition training equipment
- weapon cleaning equipment
- weapon sight mounts
- weapon sights (2 licences)

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	items for the support of military training aircraft as specified by the following entries on schedule 1 part 1 of the order : ML4bl; ML5; ML10,a,b,d,e,f,g,h,i; ML11; ML14; ML15; ML16, PL5020; ML17c,f,h,l,n; PL5017; ML21a; ML21b1a,b,c,d, ML21b3; ML21c; ML22a
2	T	inertial equipment, components for inertial equipment, technology for the use of inertial equipment, technology for the use of components for inertial equipment
3	P	equipment employing cryptography
4	P	components for military training aircraft, technology for the use of components for military training aircraft, components for military surveillance aircraft, technology for the use of components for military surveillance aircraft,
5	P	naval radars, components for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars, test equipment for naval radars, military navigation equipment, components for military navigation equipment, test equipment for military, navigation equipment, technology for the use of military navigation equipment, technology for the use of test equipment for military navigation equipment, military navigation equipment, components for military navigation equipment,
6	P	equipment for the use of general naval vessel components, general naval vessel components, technology for the use of general naval vessel components, technology for the use of equipment for the use of general naval vessel components
7	P	firing sets, components for firing sets
8	P	sporting gun ammunition
9	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapon sights, technology for the use of weapon sights
10	P	body armour, bomb suits, components for body armour, military helmets, ballistic shields, constructions for ballistic protection of military systems
11	P	military improvised explosive device disposal equipment, components for military improvised

		explosive device disposal equipment
12	T	military flying helmets, components for military flying helmets, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, aircrew protective masks, components for aircrew protective masks, aircraft military communications equipment, components for military aircraft communications equipment, military electronic equipment, components for military electronic equipment
13	P	command communications control and intelligence software
14	T	inertial equipment
15	P	airborne electronic warfare equipment, components for airborne electronic warfare equipment, airborne navigation equipment, components for airborne navigation equipment, airborne surveillance equipment, components for airborne surveillance equipment, airborne targeting equipment, components for airborne targeting equipment, military aircraft flight data recorders, airborne refuelling equipment, components for airborne refuelling equipment, aircraft radars, optical target designator equipment, optical target tracking equipment, optical target surveillance equipment, optical target acquisition equipment, attack alerting/warning equipment, electronic countermeasures equipment, laser warning detectors, bombing computers, fire control equipment, weapon control systems, combat aircraft simulators, components for combat aircraft simulators, combat aircraft training equipment, components for combat aircraft training equipment, military cameras, military photographic equipment, military image intensifier equipment, military infrared/thermal imaging equipment, military video recording equipment, sensor data recorders, technology for the development/production of combat aircraft, command communications control and intelligence software, software for the development of weapon system software, software for the monitoring of weapon system software, software for the maintenance of weapon system software, software for the maintenance of weapon system software, software for the modelling of weapon systems, software for the simulation of weapon systems, software for the evaluation of weapon systems, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, components for combat aircraft, components for military training aircraft, ejector seats, liquid oxygen converters, military aircraft pressurised breathing equipment, components for ejector seats, components for liquid oxygen converters, components for military aircraft pressurised breathing equipment, environmental test facilities for combat aircraft, military aero-engines, components for military aero-engines, military aircraft ground equipment, components for military aircraft ground equipment, military parachutes, components for military parachutes, production equipment for combat aircraft, test equipment for combat aircraft, production technology for combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft
16	P	aerial target equipment, components for aerial target equipment
17	P	technology for the use of weapon sights, technology for the use of weapon night sights, technology for the use of components for weapon sights, technology for the use of components for weapon night sights, weapon sights, components for weapon sights, weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of components for weapon sights, technology for the use of weapon sights, components for military image intensifier equipment
18	P	air defence systems training equipment, components for air defence systems, military utility vehicles, equipment for the use of air defence systems, test equipment for air defence systems
19	T	inertial equipment
20	P	Goods specified by the following entries of the EoG, ToT&PoTA(C)O: ML4b, ML5, ML10a,b,d,e,f,g & h, ML11, ML14, ML15, ML16, ML17c,f,h,j,k,l & n, PL5017, ML21a & b3 and ML22 a & b

Number of SIELs issued covering:	
Items on the Military List	23
Other items	11

Military List and other items	0
Total number of SIELs issued	34

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- accessories for photomultiplier tubes
- animal pathogens
- body armour
- chemical mixtures
- components for body armour
- components for combat aircraft
- components for frigates (4 licences)
- components for machine tools (3 licences)
- components for military aircraft ground equipment
- components for military aircraft head-up displays (4 licences)
- components for military aircraft navigation equipment
- components for military communications equipment
- components for military surveillance aircraft
- components for military utility helicopters (2 licences)
- components for naval engines
- corrosion resistant chemical manufacturing equipment
- general laboratory equipment (2 licences)
- general naval vessel components (3 licences)
- T improvised explosive device jamming equipment
- materials testing equipment
- military aircraft head-down displays
- military communications equipment
- T military communications equipment
- photomultiplier tubes
- power supplies (2 licences)
- production equipment for rifles
- technology for the use of military communications equipment

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 1.0m
---	--------

Number of SIELs issued covering:	
Items on the Military List	7
Other items	4
Military List and other items	0
Total number of SIELs issued	11

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- T armoured all wheel drive vehicles
- ballistic shields
- components for combat helicopters (2 licences)
- components for ejector seats
- components for machine pistols
- components for military aero-engines
- components for military utility helicopters (2 licences)
- corrosion resistant chemical manufacturing equipment (2 licences)
- improvised explosive device jamming equipment
- machine pistols (1)
- T marine position fixing equipment
- small arms ammunition

OPEN INDIVIDUAL EXPORT LICENCES

2	T	inertial equipment
3	T	technology for the use of military training aircraft, military training aircraft, technology for the use of aerial target equipment, aerial target equipment, components for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, technology for the use of airborne electronic warfare equipment, technology for the use of use of electronic countermeasures equipment, technology for the use of airborne electronic warfare equipment training equipment, airborne electronic warfare equipment training equipment, airborne electronic warfare equipment, electronic countermeasures equipment, equipment for the use of airborne electronic warfare equipment, equipment for the use of electronic countermeasures equipment

Somalia

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £ 100,000
---	---------------------

Number of SIELs issued covering:	
Items on the Military List	1
Other items	0
Military List and other items	0
Total number of SIELs issued	1

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

military helmets*

* the goods on these licences were for humanitarian end use

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1*	P	firing sets, improvised explosive device disposal equipment

* the goods on this licence are humanitarian end use

South Africa

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 5.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	32
Other items	25

Military List and other items	0
Total number of SIELs issued	57

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- air guns (1)
- air guns (9)
- components for air guns
- components for airborne electronic warfare equipment
- T components for armoured fighting vehicles
- components for combat aircraft
- components for combat helicopter
- components for guided missile decoying equipment
- components for military infrared/thermal imaging equipment (3 licences)
- components for military transport aircraft
- components for optical target acquisition equipment
- components for periscopes
- components for surface to air missiles
- components for test equipment for electronic warfare equipment
- components for unmanned air vehicles
- corrosion resistant chemical manufacturing equipment
- cryptographic software
- electronics cooling fluids
- equipment employing cryptography
- fibrous/filamentary materials
- gun silencers
- human pathogens
- linear cutting explosive charges
- mass spectrometers
- military cameras
- military image intensifier equipment
- military video recording equipment
- numerical control software
- rebreathing swimming apparatus (14 licences)
- shotguns (1)
- T shotguns (1) (5 licences)
- shotguns (3)
- T sporting gun ammunition (2 licences)
- sporting rifles (1)
- T sporting rifles (1) (5 licences)
- T sporting rifles (2)
- technology for the use of surface to air missiles
- training ammunition
- vibration test equipment
- T weapon sights

STANDARD INDIVIDUAL EXPORT LICENCES - INCORPORATION

Total value of SIEL applications for which a licence was issued	Less than £ 100,000
---	---------------------

Number of SIELs issued covering:	
Items on the Military List	2
Other items	0
Military List and other items	0
Total number of SIELs issued	2

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- components for naval communications equipment (2 licences)
- components for naval electronic warfare equipment (2 licences)
- components for unmanned air vehicles

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	T	submersible equipment, underwater electronic imaging systems, imaging cameras
2	T	marine position fixing equipment, bathymetric survey systems
3	P	items for the support of military training aircraft as specified by the following entries on schedule 1 part 1 of the order : ML4bl; ML5; ML10,a,b,d,e,f,g,h,i; ML11; ML14; ML15; ML16, PL5020; ML17c,f,h,l,n; PL5017; ML21a; ML21b1a,b,c,d, ML21b3; ML21c; ML22a
4	T	inertial equipment, components for inertial equipment, technology for the use of inertial equipment, technology for the use of components for inertial equipment
5	P	equipment employing cryptography
6	P	inertial equipment
7	P	components for military training aircraft, technology for the use of components for military training aircraft, components for combat aircraft, technology for the use of components for combat aircraft, components for military transport aircraft,
8	P	equipment for the use of general naval vessel components, general naval vessel components, technology for the use of general naval vessel components, technology for the use of equipment for the use of general naval vessel components
9	P	components for air to air missile launching equipment, components for air to surface missile launching equipment, components for combat aircraft
10	P	software for the use of test equipment for missile jamming equipment, software for the use of test equipment for optical target designator equipment, software for the use of test equipment for optical target tracking equipment, software for the use of test equipment for laser range finder, technology for the use of test equipment for missile jamming equipment, technology for the use of test equipment for optical target designator equipment, technology for the use of test equipment for optical target tracking equipment, technology for the use of test equipment for optical target acquisition equipment, technology for the use of test equipment for laser range finder, technology for the use of software for the use of test equipment for missile jamming equipment, technology for the use of software for the use of test equipment for optical target designator equipment, technology for the use of software for the use of test equipment for optical target tracking equipment, technology for the use of software for the use of test equipment for optical target acquisition equipment, technology for the use of software for the use of test equipment for laser range finder, test equipment for laser range finder, test equipment for missile jamming equipment, test equipment for optical target designator equipment, test equipment for optical target tracking equipment, test equipment for optical target acquisition equipment
11	P	chemical agent detection equipment training equipment, chemical agent detection equipment, components for chemical agent detection equipment, test equipment for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, chemical agent detection equipment training equipment, components for chemical agent detection equipment training equipment, military electronic equipment, components for military electronic equipment, biological agent detection equipment, components for biological agent detection equipment, software for the use of chemical agent detection equipment, software for the use of biological agent detection equipment, software for the use of test equipment for chemical agent detection equipment, software for the use of equipment for the use of chemical agent detection equipment, software for the use of chemical agent detection equipment training equipment, software for the use military electronic equipment, technology for the use of biological agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of components for biological agent detection equipment, technology for the use of components for chemical agent detection equipment, technology for the use of test equipment for the use of chemical agent detection equipment, technology for the use of components for test equipment for the use of chemical agent detection equipment, technology for the use of equipment for the use of chemical agent detection equipment, technology for the use of components for equipment for the use of chemical agent detection equipment, technology for the use of chemical agent detection equipment training equipment, technology for the use of components for chemical agent detection equipment training equipment, technology for the use of military electronic equipment, technology for the use of components for military equipment, test equipment for chemical agent detection equipment, test equipment for biological agent detection equipment, test equipment for military electronic equipment, test equipment for test equipment for chemical agent detection equipment, test equipment for chemical agent detection equipment training equipment, equipment for the use of chemical agent detection equipment, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment, equipment for the use of test equipment for chemical agent detection equipment, equipment for the use of chemical agent detection equipment training equipment, improvised explosive device detection equipment, components for improvised explosive device detection equipment, technology for the use of improvised explosive device detection equipment, technology for the use of components for improvised explosive device detection equipment
12	P	firing sets, components for firing sets

13	P	naval shock mounts, components for naval shock mounts
14	P	equipment for the use of weapon sights, weapon sights, components for weapon sights, technology for the production of equipment for the use of weapon sights, technology for the production of weapon sights, technology for the production of components for weapon sights, technology for the use of equipment for the use of weapon sights, technology for the use of weapon sights, technology for the use of components for weapon sights
15	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapon sights, technology for the use of weapon sights
16	P	equipment employing cryptography
17	T	military flying helmets, components for military flying helmets, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, aircrew protective masks, components for aircrew protective masks, aircraft military communications equipment, components for military aircraft communications equipment, military electronic equipment, components for military electronic equipment
18	P	command communications control and intelligence software
19	P	bathymetric survey systems, marine position fixing equipment, magnetometers, inertial equipment
20	T	inertial equipment
21	P	components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, components for military aero-engines, general military aircraft components, military aircraft navigation equipment, general military vehicle components, general naval vessel components, military electronic equipment, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
22	P	equipment employing cryptography
23	P	components for combat aircraft, components for combat helicopters, components for military aero-engines, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, general military aircraft components
24	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
25	P	components for military aero-engines components for naval engines general military aircraft components
26	P	aircraft military communications equipment
27	P	components for combat aircraft, components for military aircraft pressurised breathing equipment
28	P	equipment for operation of military aircraft on confined areas, components for equipment for operation of military aircraft on confined areas, general naval vessel components, components for aircraft carriers, general naval vessel components, equipment for operation of military aircraft on confined areas, components for equipment for operation of military aircraft on confined areas, technology for the use of general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for submarines, technology for the use of equipment for operation of aircraft on confined areas, technology for the use of components for mine sweepers

Spain

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 2.0m
Number of SIELs issued covering:	

Items on the Military List	5
Other items	5
Military List and other items	2
Total number of SIELs issued	0

7

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- components for military electronic warfare equipment
- components for munition fuzes
- components for pyrotechnic ammunition
- improvised explosive device detection equipment
- inert ammunition
- T military infrared/thermal imaging equipment
- shotguns (1)
- technology for the development of products containing enriched uranium
- technology for the use of military communication equipment
- technology for the use of nuclear fuel element fabrication equipment
- test models for munitions fuzes
- T weapon night sights

STANDARD INDIVIDUAL EXPORT LICENCES - INCORPORATION

Total value of SIEL applications for which a licence was issued	Less than £ 100,000
---	---------------------

Number of SIELs issued covering:	
Items on the Military List	1
Other items	1
Military List and other items	0
Total number of SIELs issued	2

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- components for military training aircraft
- non-military detonators (2 licences)
- non-military firing sets (2 licences)

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military utility helicopters
2	P	components for military training aircraft, technology for the use of components for military training aircraft, components for military utility helicopters, technology for the use of components for military utility helicopters, components for
3	P	technology for the production of components for biological agent detection equipment, technology for the production of components for chemical agent detection equipment
4	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, chemical agent detection equipment training equipment, components for chemical agent detection equipment training equipment, military electronic equipment, components for military electronic equipment, biological agent detection equipment, components for biological agent detection equipment, improvised explosive device detection equipment, components for improvised explosive device detection equipment, software for the use of biological agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of improvised explosive device detection equipment, technology for the use of biological agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of improvised explosive device detection equipment, test equipment for biological agent detection equipment, test equipment for chemical agent detection equipment, test equipment for military electronic equipment, test equipment for improvised explosive device detection equipment, equipment for the use of biological agent detection equipment, equipment for the use of chemical agent detection equipment, equipment for the use of military electronic equipment, equipment for the use of improvised explosive device

		detection equipment
5	P	components for air to air missile launching equipment, components for air to surface missile launching equipment, components for combat aircraft
6	P	demolition charges, equipment for the use of demolition charges, explosives
7	P	software for the use of test equipment for missile jamming equipment, software for the use of test equipment for optical target designator equipment, software for the use of test equipment for optical target tracking equipment, software for the use of test equipment for optical target acquisition equipment, software for the use of test equipment for laser range finder, technology for the use of test equipment for missile jamming equipment, technology for the use of test equipment for optical target designator equipment, technology for the use of test equipment for optical target tracking equipment, technology for the use of test equipment for optical target acquisition equipment, technology for the use of test equipment for laser range finder, technology for the use of software for the use of test equipment for missile jamming equipment, technology for the use of software for the use of test equipment for optical target designator equipment, technology for the use of software for the use of test equipment for optical target tracking equipment, technology for the use of software for the use of test equipment for optical target acquisition equipment, technology for the use of software for the use of test equipment for laser range finder, test equipment for laser range finder, test equipment for missile jamming equipment, test equipment for optical target designator equipment, test equipment for optical target tracking equipment, test equipment for optical target acquisition equipment
8	P	firing sets, components for firing sets
9	P	equipment for the use of weapon sights, weapon sights, components for weapon sights, technology for the production of equipment for the use of weapon sights, technology for the production of weapon sights, technology for the production of components for weapon sights, technology for the use of equipment for the use of weapon sights, technology for the use of weapon sights, technology for the use of components for weapon sights
10	P	software for optimising equipment designs
11	P	military aircraft pressure refuellers, test equipment for military aircraft pressure refuellers
12	P	airborne refuelling equipment, components for airborne refuelling equipment, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
13	P	command communications control and intelligence software
14	T	military surveillance aircraft
15	P	components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, components for military aero-engines, general military aircraft components, military aircraft navigation equipment, general military vehicle components, general naval vessel components, military electronic equipment, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
16	P	training small calibre artillery ammunition, small calibre artillery ammunition, aircraft cannon ammunition, training aircraft cannon ammunition, mortar bombs, smoke ammunition, pyrotechnic ammunition, components for smoke ammunition, components for pyrotechnic ammunition
17	P	components for combat aircraft, components for combat helicopters, components for military aero-engines, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, general military aircraft components
18	P	aerial target equipment, components for aerial target equipment, missile scoring equipment, components for missile scoring equipment
19	P	technology for the use of equipment for the use of components for military transport aircraft, technology for the use of components for military transport aircraft, components for military transport aircraft, equipment for the use of components for military transport aircraft
20	P	forgings for military aero-engines, forgings for combat aircraft, unfinished products for military aero-engines, unfinished products for combat aircraft, castings for military aero-engines, castings for

		combat aircraft
21	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
22	P	unmanned air vehicles, unmanned air vehicle control/handling/launching/support equipment, components for unmanned air vehicles, components for unmanned air vehicle control/handling/launching/support equipment
23	P	technology for the use of weapon sights, technology for the use of weapon night sights, technology for the use of components for weapon sights, technology for the use of components for weapon night sights, weapon sights, components for weapon sights, weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of components for weapon sights, technology for the use of weapon sights, components for military image intensifier equipment
24	P	aircraft military communications equipment
25	P	components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, military aircraft head-down displays, components for military aircraft head-down displays, general military aircraft components, military aircraft head-up displays, components for military aircraft head-up displays, military electronic equipment, components for military electronic equipment, military video recording equipment, components for military video recording equipment, components for combat helicopters, air to surface rockets launching equipment, components for air to surface rockets launching equipment, night vision goggles, components for night vision goggles, military aircraft ground equipment, components for military aircraft ground equipment, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military utility aircraft, test equipment for military head-down displays, test equipment for military head-up displays, test equipment for military electronic equipment, test equipment for military video recording equipment, test equipment for combat helicopters, test equipment for night vision goggles, test equipment for military aircraft ground equipment, test equipment for air to surface rocket launching equipment

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 0.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	16
Other items	2
Military List and other items	0
Total number of SIELs issued	18

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

body armour
 components for body armour
 components for laser range finders
 components for military training aircraft (4 licences)
 military aero-engines
 military small arms training equipment
 non-military explosives/propellants
 revolvers (1)
 rifles (1)
 semi-automatic pistols (2)
 shotguns (1)
 shotguns (2)
 software for the modelling of weapon systems
 software for the simulation of weapon systems
 software for the use of surface to air missiles training equipment
 sporting rifles (2)
 sporting rifles (2)
 technology for the use of software for the modelling of weapon systems
 toxins

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	items for the support of military training aircraft as specified by the following entries on schedule 1 part 1 of the order : ML4bl; ML5; ML10,a,b,d,e,f,g,h,i; ML11; ML14; ML15; ML16, PL5020; ML17c,f,h,l,n; PL5017; ML21a; ML21b1a,b,c,d, ML21b3; ML21c; ML22a
2	P	components for military training aircraft, technology for the use of components for military
3	P	technology for the production of components for biological agent detection equipment, technology for the production of components for chemical agent detection equipment
4	P	components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, equipment for the development of chemical agent detection equipment, production equipment for chemical
5	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, chemical agent detection equipment training equipment, components for chemical agent detection equipment training equipment, military electronic equipment, components for military electronic equipment, biological agent detection equipment, components for biological agent detection equipment, improvised explosive device detection equipment, components for improvised explosive device detection equipment, software for the use of biological agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of improvised explosive device detection equipment, technology for the use of biological agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of improvised explosive device detection equipment, test equipment for biological agent detection equipment, test equipment for chemical agent detection equipment, test equipment for military electronic equipment, test equipment for improvised explosive device detection equipment, equipment for the use of biological agent detection equipment, equipment for the use of chemical agent detection equipment, equipment for the use of military electronic equipment, equipment for the use of improvised explosive device detection equipment
6	P	components for air to air missile launching equipment, components for air to surface missile launching equipment, components for combat aircraft
7	P	software for the use of test equipment for missile jamming equipment, software for the use of test equipment for optical target designator equipment, software for the use of test equipment for optical target tracking equipment, software for the use of test equipment for optical target acquisition equipment, software for the use of test equipment for laser range finder, technology for the use of test equipment for missile jamming equipment, technology for the use of test equipment for optical target designator equipment, technology for the use of test equipment for optical target tracking equipment, technology for the use of test equipment for optical target acquisition equipment, technology for the use of test equipment for laser range finder, technology for the use of software for the use of test equipment for missile jamming equipment, technology for the use of software for the use of test equipment for optical target designator equipment, technology for the use of software for the use of test equipment for optical target tracking equipment, technology for the use of software for

		the use of test equipment for optical target acquisition equipment, technology for the use of software for the use of test equipment for laser range finder, test equipment for laser range finder, test equipment for missile jamming equipment, test equipment for optical target designator equipment, test equipment for optical target tracking equipment, test equipment for optical target acquisition equipment
8	P	sporting gun ammunition
9	P	sporting rifles, components for sporting rifles, shotguns, components for shotguns, combination rifle-shotguns, components for combination rifle-shotguns, sporting gun ammunition
10	P	military aircraft pressure refuellers, test equipment for military aircraft pressure refuellers
11	P	airborne refuelling equipment, components for airborne refuelling equipment, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
12	P	command communications control and intelligence software
13	P	components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, components for military aero-engines, general military aircraft components, military aircraft navigation equipment, general military vehicle components, general naval vessel components, military electronic equipment, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
14	P	components for combat aircraft, components for combat helicopters, components for military aero-engines, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, general military aircraft components
15	P	forgings for military aero-engines, forgings for combat aircraft, unfinished products for military aero-engines, unfinished products for combat aircraft, castings for military aero-engines, castings for combat aircraft
16	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
17	P	technology for the use of weapon sights, technology for the use of weapon night sights, technology for the use of components for weapon sights, technology for the use of components for weapon night sights, weapon sights, components for weapon sights, weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of components for weapon sights, technology for the use of weapon sights, components for military image intensifier equipment
18	P	general military aircraft components
19	P	air defence systems training equipment, components for air defence systems, military utility vehicles, equipment for the use of air defence systems, test equipment for air defence systems
20	P	aircraft military communications equipment

Syria

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £ 100,000
---	---------------------

Number of SIELs issued covering:	
Items on the Military List	0
Other items	3
Military List and other items	0
Total number of SIELs issued	3

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

electronic components
flow measurement equipment
nuclear radiation detection equipment

Number of SIELs refused covering:	
Items on the Military List	0
Other items	4
Military List and other items	0
Total number of SIELs refused	4

Rating	End Use
No of SIELS covering items with this rating	4

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary

Taiwan

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 9.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	9
Other items	13
Military List and other items	0
Total number of SIELs issued	22

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

accessories for semiconductor process equipment
ballistic test equipment
biotechnology equipment
body armour
components for ballistic test equipment
components for combat aircraft
components for military aero-engines
components for military transport aircraft
components for semiconductor process equipment (2 licences)
components for submarines
T firearm training simulators
T improvised explosive device disposal equipment
inertial equipment
lubricants
mass spectrometers
military electronic equipment
military navigation equipment
polyarylene ether ketones
semiconductor process equipment (4 licences)

- T software for the use of ballistic test equipment
- software for the use of firearm training simulators
- tape recording equipment
- technology for the use of ballistic test equipment
- T technology for the use of firearm training simulators
- T weapon sights

STANDARD INDIVIDUAL EXPORT LICENCES - INCORPORATION

Total value of SIEL applications for which a licence was issued	Less than £ 100,000

Thailand

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 250,000
---	-----------

Number of SIELs issued covering:	
Items on the Military List	6
Other items	8
Military List and other items	0
Total number of SIELs issued	14

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- aircraft military communications equipment
- chemicals used for food production (3 licences)
- components for armoured fighting vehicles
- components for combat aircraft
- components for military aero-engines
- corrosion resistant chemical manufacturing equipment (2 licences)
- equipment employing cryptography
- improvised explosive device disposal equipment
- T improvised explosive device disposal equipment
- sporting gun ammunition
- technology for the production of small calibre artillery
- technology for the use of aircraft military communications equipment

technology for the use of small calibre artillery

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	T	submersible equipment, underwater electronic imaging systems, imaging cameras
2	P	components for combat aircraft simulators
3	T	inertial equipment, components for inertial equipment, technology for the use of inertial equipment, technology for the use of components for inertial equipment
4	P	equipment employing cryptography
5	P	inertial equipment
6	P	components for military training aircraft, technology for the use of components for military training aircraft, components for military utility aircraft, technology for the use of components for military utility aircraft, components for military
7	P	naval radars, components for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars, test equipment for naval radars, military navigation equipment, components for military navigation equipment, test equipment for military, navigation equipment, technology for the use of military navigation equipment, technology for the use of test equipment for military navigation equipment, military navigation equipment, components for military navigation equipment,
8	P	equipment for the use of general naval vessel components, general naval vessel components, technology for the use of general naval vessel components, technology for the use of equipment for the use of general naval vessel components
9	T	military flying helmets, components for military flying helmets, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, aircrew protective masks, components for aircrew protective masks, aircraft military communications equipment, components for military aircraft communications equipment, military electronic equipment, components for military electronic equipment
10	P	bathymetric survey systems, marine position fixing equipment, magnetometers, inertial equipment
11	T	inertial equipment
12	P	mixtures containing toxic chemical precursors
13	T	inertial equipment
14	P	Goods specified by the following entries of the EoG, ToT&PoTA(C)O: ML4b, ML5, ML10a,b,d,e,f,g & h, ML11, ML14, ML15, ML16, ML17c,f,h,j,k,l & n, PL5017, ML21a & b3 and ML22 a & b
15	P	technology for the use of large calibre artillery, large calibre artillery, components for large calibre artillery, technology for the production of large calibre artillery
Applications refused on full

5	P	inertial equipment
6	P	components for military training aircraft, technology for the use of components for military training aircraft, components for military surveillance aircraft, technology for the use of components for military surveillance aircraft,
7	P	naval radars, components for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars, test equipment for naval radars, military navigation equipment, components for military navigation equipment, test equipment for military, navigation equipment, technology for the use of military navigation equipment, technology for the use of test equipment for military navigation equipment, military navigation equipment, components for military navigation equipment,
8	P	software for the use of test equipment for missile jamming equipment, software for the use of test equipment for optical target designator equipment, software for the use of test equipment for optical target tracking equipment, software for the use of test equipment for optical target acquisition equipment, software for the use of test equipment for laser range finder, technology for the use of test equipment for missile jamming equipment, technology for the use of test equipment for optical target designator equipment, technology for the use of test equipment for optical target tracking equipment, technology for the use of test equipment for optical target acquisition equipment, technology for the use of test equipment for laser range finder, technology for the use of software for the use of test equipment for missile jamming equipment, technology for the use of software for the use of test equipment for optical target designator equipment, technology for the use of software for the use of test equipment for optical target tracking equipment, technology for the use of software for the use of test equipment for optical target acquisition equipment, technology for the use of software for the use of test equipment for laser range finder, test equipment for laser range finder, test equipment for missile jamming equipment, test equipment for optical target designator equipment, test equipment for optical target tracking equipment, test equipment for optical target acquisition equipment
9	P	firing sets, components for firing sets
10	P	sporting gun ammunition
11	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapon sights, technology for the use of weapon sights
12	P	military aircraft pressure refuellers, test equipment for military aircraft pressure refuellers
13	P	airborne refuelling equipment, components for airborne refuelling equipment, components for

		combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
14	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
15	T	military flying helmets, components for military flying helmets, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, aircrew protective masks, components for aircrew protective masks, aircraft military communications equipment, components for military aircraft communications equipment, military electronic equipment, components for military electronic equipment
16	P	command communications control and intelligence software
17	T	inertial equipment
18	P	aerial target equipment, components for aerial target equipment
19	P	components for naval engines, equipment for the use of naval engines
20	P	technology for the use of weapon sights, technology for the use of weapon night sights, technology for the use of components for weapon sights, technology for the use of components for weapon night sights, weapon sights, components for weapon sights, weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of components for weapon sights, technology for the use of weapon sights, components for military image intensifier equipment
21	T	inertial equipment
22	P	Goods specified by the following entries of the EoG, ToT&PoTA(C)O: ML4b, ML5, ML10a,b,d,e,f,g & h, ML11, ML14, ML15, ML16, ML17c,f,h,j,k,l & n, PL5017, ML21a & b3 and ML22 a & b

STANDARD INDIVIDUAL TRADE CONTROL LICENCES

Source	Issued	Refused	Revoked
USA	1		

United States of America

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 20.0m
---	---------

Number of SIELs issued covering:	
Items on the Military List	133
Other items	13
Military List and other items	0
Total number of SIELs issued	146

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- air guns (18)
- animal pathogens
- armoured fighting vehicles
- armoured personnel carriers (2 licences)
- armoured plate
- bomb suits
- botulinum toxin vaccines (2 licences)
- CBW munitions disposal equipment
- chemical agent detection equipment (2 licences)
- civil NBC protection equipment
- combat aircraft
- command communications control and intelligence software
- components for air to surface missiles (2 licences)

components for aircraft radars (2 licences)
 components for armoured fighting vehicles
 components for armoured personnel carriers (2 licences)
 components for body armour
 components for combat aircraft (3 licences)
 components for combat helicopters (4 licences)
 components for command communications control and intelligence equipment
 components for fire control equipment (2 licences)
 components for ground based radars (3 licences)
 components for laser range finders
 components for light naval guns
 components for military aero-engines (3 licences)
 T components for military aero-engines
 components for military aircraft head-up displays
 T components for military communications equipment
 components for military communications equipment
 components for military electronic warfare equipment (4 licences)
 T components for military infrared/thermal imaging equipment
 components for military surveillance aircraft
 components for military training aircraft (3 licences)
 components for military transport aircraft (2 licences)
 components for military utility helicopters (4 licences)
 components for naval engines
 components for naval radars
 components for NBC clothing (2 licences)
 components for NBC protective equipment
 components for rifles
 components for semi-automatic pistols
 components for shotguns
 components for small arms ammunition
 components for smoke generators
 components for sporting rifles
 components for surface to surface missiles (3 licences)
 components for tanker aircraft
 components for tanks
 components for unmanned air vehicles (4 licences)
 T components for unmanned air vehicles
 components for weapon day and night sights
 T devices containing helium-3
 equipment for the use of armoured fighting vehicles
 T equipment for the use of military communications equipment
 equipment for the use of small arms ammunition
 explosives
 extended temperature range integrated circuits
 forgings for military aero-engines
 general military aircraft components
 general naval vessel components (3 licences)
 ground vehicle military communications equipment
 heavy machine guns (1)
 heavy machine guns training equipment
 high performance air traffic control software
 high speed pulse generators (2 licences)
 instrumentation cameras
 materials containing natural uranium
 metal alloy on cylindrical forms
 military aero-engines
 military aircraft ground equipment
 military communications equipment (5 licences)
 T military communications equipment
 military electronic equipment (5 licences)
 military helmets
 military improvised explosive device detection equipment
 T military infrared/thermal imaging equipment (2 licences)
 military utility vehicles
 production equipment for small arms ammunition
 products containing natural uranium
 pyrotechnics/fuels and related substances

- rifles (1) (3 licences)
- semi-automatic pistols (3346)
- shotguns (1) (12 licences)
- shotguns (11)
- shotguns (2)
- small arms ammunition
- software for optimising equipment designs (2 licences)
- software for the use of military aircraft head-up displays
- T software for the use of military parametric technical databases
- software for the use of unmanned air vehicles
- T software to simulate the function of command communications control and intelligence
- software to simulate the function of unmanned air vehicles training equipment
- sporting rifles (1) (3 licences)
- sporting rifles (2)
- sporting rifles (70)
- tanks
- tanks
- technology for the use of military communications equipment (2 licences)
- T technology for the use of military communications equipment
- technology for the use of military electronic equipment (5 licences)
- technology for the use of unmanned air vehicles
- test equipment for bomb launching equipment
- test equipment for general military aircraft components
- test equipment for military transport aircraft
- training equipment for electronic warfare equipment
- triggered spark gaps
- unfinished products for military aero-engines
- unfinished products for revolvers (3 licences)
- vintage guns (2)
- T weapon control systems
- weapon sight mounts
- weapon sights (2 licences)

STANDARD INDIVIDUAL EXPORT LICENCES - INCORPORATION

Total value of SIEL applications for which a licence was issued	£ 1.0m
---	--------

Number of SIELs issued covering:	
Items on the Military List	6
Other items	0
Military List and other items	0
Total number of SIELs issued	6

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- components for combat helicopters
- components for military communications equipment
- components for missile jamming equipment
- components for naval radars
- forgings for naval engines
- military aircraft navigation equipment

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	items for the support of military training aircraft as specified by the following entries on schedule 1 part 1 of the order : ML4bl; ML5; ML10,a,b,d,e,f,g,h,i; ML11; ML14; ML15; ML16, PL5020; ML17c,f,h,l,n; PL5017; ML21a; ML21b1a,b,c,d, ML21b3; ML21c; ML22a
2	P	sporting gun ammunition, sporting rifles, combination rifle-shotguns, shotguns, small arms ammunition
3	P	components for combat aircraft, components for military utility helicopters, components for patrol
4	P	components for military utility helicopters, technology for the use of components for military utility helicopters, components for military training aircraft, technology for the use of components for military training aircraft,

5	P	technology for the production of components for biological agent detection equipment, technology for the production of components for chemical agent detection equipment
6	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, chemical agent detection equipment training equipment, components for chemical agent detection equipment training equipment, military electronic equipment, components for military electronic equipment, biological agent detection equipment, components for biological agent detection equipment, improvised explosive device detection equipment, components for improvised explosive device detection equipment, software for the use of biological agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of improvised explosive device detection equipment, technology for the use of biological agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of improvised explosive device detection equipment, test equipment for biological agent detection equipment, test equipment for chemical agent detection equipment, test equipment for military electronic equipment, test equipment for improvised explosive device detection equipment, equipment for the use of biological agent detection equipment, equipment for the use of chemical agent detection equipment, equipment for the use of military electronic equipment, equipment for the use of improvised explosive device detection equipment
7	P	components for air to air missile launching equipment, components for air to surface missile launching equipment, components for combat aircraft
8	P	software for the use of test equipment for missile jamming equipment, software for the use of test equipment for optical target designator equipment, software for the use of test equipment for optical target tracking equipment, software for the use of test equipment for optical target acquisition equipment, software for the use of test equipment for laser range finder, technology for the use of test equipment for missile jamming equipment, technology for the use of test equipment for optical target designator equipment, technology for the use of test equipment for optical target tracking equipment, technology for the use of test equipment for optical target acquisition equipment, technology for the use of test equipment for laser range finder, technology for the use of software for the use of test equipment for missile jamming equipment, technology for the use of software for the use of test equipment for optical target designator equipment, technology for the use of software for the use of test equipment for optical target tracking equipment, technology for the use of software for the use of test equipment for optical target acquisition equipment, technology for the use of software for the use of test equipment for laser range finder, test equipment for laser range finder, test equipment for missile jamming equipment, test equipment for optical target designator equipment, test equipment for optical target tracking equipment, test equipment for optical target acquisition equipment
9	P	components for military training aircraft, technology for the use of military training aircraft, test equipment for military training aircraft, components for test equipment for military training aircraft
10	P	sporting gun ammunition
11	T	components for military transport aircraft, technology for the use of military transport aircraft
12	P	components for combat aircraft, components for military aero-engines, components for military search and rescue aircraft, components for military training aircraft, components for military surveillance aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, general military aircraft components, components for military aircraft head-down displays, components for military aircraft head-up displays, components for aircraft military communications equipment, military aircraft navigation equipment, airborne electronic warfare equipment
13	P	air guns
14	P	components for military aero-engines, unfinished products for military aero-engines
15	P	equipment for the use of weapon sights, weapon sights, components for weapon sights, technology for the production of equipment for the use of weapon sights, technology for the production of weapon sights, technology for the production of components for weapon sights, technology for the use of equipment for the use of weapon sights, technology for the use of weapon sights, technology for the use of components for weapon sights
16	P	software for optimising equipment designs
17	P	sporting rifles, components for sporting rifles, shotguns, components for shotguns, combination rifle-shotguns, components for combination rifle-shotguns, sporting gun ammunition
18	P	airborne refuelling equipment, components for airborne refuelling equipment, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of

		military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
19	P	components for surface to surface missiles, technology for the development of components for surface to surface missiles
20	P	command communications control and intelligence software
21	P	technology for the use of unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle support equipment, software for the use of unmanned air vehicles, test equipment for unmanned air vehicles
22	P	components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, components for military aero-engines, general military aircraft components, military aircraft navigation equipment, general military vehicle components, general naval vessel components, military electronic equipment, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
23	P	mortar bombs, smoke ammunition, pyrotechnic ammunition
24	P	aerial target equipment, components for aerial target equipment
25	P	forgings for military aero-engines, forgings for combat aircraft, unfinished products for military aero-engines, unfinished products for combat aircraft, castings for military aero-engines, castings for combat aircraft
26	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
27	P	unmanned air vehicles, unmanned air vehicle control/handling/launching/support equipment, components for unmanned air vehicles, components for unmanned air vehicle control/handling/launching/support equipment
28	P	components for military aero-engines, components for naval engines, general military aircraft components
29	P	shotguns, vintage guns, sporting rifles, rifles, vintage guns
30	P	aircraft military communications equipment
31	T	inertial equipment
32	P	components for NBC filters, components for NBC respirators
33	P	software for the development of unmanned air vehicles, software for the use of unmanned air vehicles, technology for the development of unmanned air vehicles, technology for the use of unmanned air
34	P	shotguns, production equipment for sporting gun ammunition
35	P	shotguns, components for shotguns, sporting rifles, components for sporting rifles, revolvers, components for revolvers, semi-automatic pistols, components for semi-automatic pistols, air guns, components for air guns, sporting gun ammunition
36	P	components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, military aircraft head-down displays, components for military aircraft head-down displays, general military aircraft components, military aircraft head-up displays, components for military aircraft head-up displays, military electronic equipment, components for military electronic equipment, military video recording equipment, components for military video recording equipment, components for combat helicopters, air to surface rockets launching equipment, components for air to surface rockets launching equipment, night vision goggles, components for night vision goggles, military aircraft ground equipment, components for military aircraft ground equipment, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military utility aircraft, test equipment for military head-down displays, test equipment for military head-up displays, test equipment for military electronic equipment, test equipment for military video recording equipment, test equipment for combat helicopters, test equipment for night vision goggles, test equipment for military aircraft ground equipment, test equipment for air to surface rocket launching equipment
37	P	sporting gun ammunition
38	P	Goods specified by the following entries of the EoG, ToT&PoTA(C)O: ML4b, ML5,

		ML10a,b,d,e,f,g & h, ML11, ML14, ML15, ML16, ML17c,f,h,j,k,l & n, PL5017, ML21a & b3 and ML22 a & b
